Disruptive Legal Innovation

In2Law is an incubator that embraces professionals sharing a passion for Law and Technology. We work for Companies and Law Firms analysing, customising, and redefining legal needs, understanding business models and finding the right professionals needed.

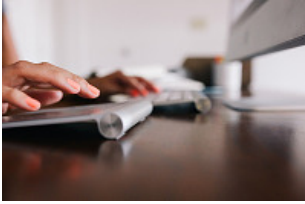

We want to be your Partners, not only your Consultants.

We think of our business as Legal As A Service, outsourcing in-house resources

We work by projects and results with a Do more with Less spirit.

And, we work to have Happy Clients.

Our Business

In2law is an Outsourcing provider of Legal Services. We serve Companies and Law Firms to enable their business and concentrate on priorities.

Our business is to provide our customers the most qualified flexible legal resources for the support of the business, with an optimization of economic resources and a cost saving compared to traditional legal services.

Our Plus: Speed, understanding of the business, customer satisfaction, hand over skills and expertise to customer's staff

Employee Control
Internal Privacy

Efficiency

Proximity to clients and knowledge of its business are crucial to meet the demand. We work on personalized services focused in enabling businesses providing flexible resources.

Workload can be extremely variable, a correct staffing means having their right resources in the right moment.

Changes in team compositions, due to maternity leaves, promotions, retirement or other events, are hard to manage: we supply qualified resource to cover the emergency or to fulfil the position.

Sharing

In business, we assist to a waste of resources not for lack of skills but because the lifestyle choices are not compatible with a world based on production capacity and not on competence or on solving customer problems

Sharing Economy provides us with a new paradigma, we do not buy anymore but we get access to the best resources at a flexible and reasonable price.

We want to take the challenge of being real innovators in the legal arena. Recruit the correct human resources is a key factor for our and your success

Innovation

We share passion for Innovation.

We believe that it is a key factor for success and growth.

We are curious and willing to change boundaries and try new models.

Cloud Computing, Cyber Security, Sharing Economy, Internet of Things, Robotics & Drones and Biotechnology are changing the paradigms of the world and have raised the need of a new approach and vision not only on how law are interpreted and applied but also on how legal services should be provided.
